COURSE CODE: T206_2

An introduction to sustainable energy

<https://www.open.edu/openlearn/nature-environment/environmental-studies/an-introduction-sustainable-energy/content-section-0>

Course summary

The search for sustainable energy will dominate the twenty-first century. This free course, An introduction to sustainable energy, provides an introductory overview of the present energy systems and takes a brief look at where the world may find energy in the future - cleaner use of fossil fuels or renewable energy sources?

Learning outcomes

By completing this course, the learner should be able to:

- understand and be aware of the importance of sustainable energy
- demonstrate an overview of the main sources of renewable energy.

Completed study

The learner has completed the following:

Section 1

Why sustainable energy matters

Section 2

Definitions energy sustainability and the future

Section 3

Present energy sources and sustainability

Section 4

Renewable energy sources

Section 5

Energy services and efficiency improvement

Section 6

Energy in a sustainable future
